

Mr. Gregory Danneffel
District Supervisor
Kalamazoo District Office
Water Division, MDEQ
7953 Adobe Road
Kalamazoo, MI 49009-5026

Subject:

Former Plainwell Impoundment
Plainwell Dam, near 12th Street, Plainwell, Michigan
Retained Self-Monitoring Requirements

Dear Mr. Danneffel:

ARCADIS has prepared this report to comply with the year-end reporting requirements as described in Section C, Part 3 of Substantive Requirements Document (SRD) MIU990025.

According to the SRD, the discharger (ARCADIS) is required to maintain a year-to-date log of retained self-monitoring reports. The discharger must certify to the Michigan Department of Environmental Quality (MDEQ) that these year-to-date logs have been retained and that the application on which the SRD was based still accurately describes the discharge.

Discharge commenced at the Former Plainwell Impoundment in July 2007 and will continue through the middle of January 2008. The volume of water treated and discharged was recorded daily and summarized on a monthly basis. The required influent, mid-point, and effluent sampling and analysis was also conducted as required by the SRD and retained with the treatment and discharge data in the year-to-date log. Analytical data and discharge data were used to calculate monthly loading data. These year-to-date logs are available for review at the site or by contacting the Facility Contact provided in the SRD.

The application on which the SRD is based still accurately describes the discharge. No additional discharge is anticipated until March 2008. No significant changes to the discharge have occurred or are anticipated to occur when discharge resumes. Some minor adjustments were made to the outfall locations during 2007, but the outfalls remained approximately at the coordinates described to MDEQ in the SRD.
